

# XP100 EXTENDA PAN

Solves a multiple of difficult installation situations through the use of its unique and patented extended channel.

- Allows for variable offsets between the sewer pipe and the pan spigot in 10mm increments up to 100mm. Never again curse a misaligned sewer pipe!
- Avoids major jack hammering of the slab and saves hours of installation hassles.
- Ideal solution for retrofits of new water efficient pans with only minor rebating required.
- May be installed prior to pour to provide flexibility in subsequent pan choice and installation.
